

The following is provided in an effort to assist you in developing a medical emergency procedure or policy for your office.

Note: This does not represent legal advice. Federal regulations and laws of individual states should be evaluated to ensure compliance.

Medical Emergency Procedure

In the event of a life threatening health emergency, follow the steps below:

1. Call "911" for Emergency Medical Systems support and provide all pertinent information.
2. Administer first aid, CPR, or other appropriate procedures to the limit of your training and experience.
3. Call for assistance from others in the office, if available.
4. Notify _____ (doctor, owner, etc) immediately.
5. Document the event in a clear and concise manner.
